Ferro Titanium Cored Wire Manufacturer India

Ferro Titanium Cored Wires are used extensively in the construction industry. These wires are used to join the different pieces of a structure and make it stable. They also carry electrical current from one piece of the structure to another.

Cored Wires are most commonly made from steel, but ferro titanium is gaining popularity too because of its light weight, high strength, resistance to corrosion and other environmental factors, and its versatility.

You can use it for both indoor or outdoor installation projects or any purpose where you need to be sure that your wiring will work smartly and efficiently.

Our Cored Wires come in different lengths so you can choose the wire that best suits your needs. They are available in a variety of colors that will help you identify them easily, even if they are hidden inside a wall or strung along a rooftop.

We are often called as the premier Manufacturer, Exporter, and Supplier of [Ferro Titanium Cored Wires](http://www.ferrotitanium.in) from Chhattisgarh, India.
