FAQs

Question 1: Is Cricut Design Space really free?

Answer: Absolutely, yes, the software is available for free, and you do not have to buy it. The app is available on computers, laptops, smartphones, and tablets, and it doesn't cost any of these platforms. Moreover, the software comes with many free resources like fonts, ready-made projects, images, and more.

Question 2: Can I use Cricut software offline?

Answer: In order to use the software offline, you will need to make sure you are using it on Mac, Windows, and iOS devices only. The offline feature is supported only on these three platforms except for Android. However, users can design and edit their projects offline without any hassle. In short, you can use the Cricut without the internet, but you won't be able to access resources.

Question 3: Can I use Cricut app only on a computer?

Answer: No, nothing like this. This is not the case, and hence, you will need to have a computer if you want to access all the features to create a project. However, mobile phones are compatible with the app, so you can try them out without any hassle.
