

Cricut Joy Xtra: A Versatile and Easy-to-Use Crafting Machine

Are you looking for a crafting machine that is space-friendly? Do you find other tools taking too much of your room space? It's frustrating! Isn't it? With [Cricut Joy Xtra](#), you don't have to worry at all about spaces.

Not only is this wonderful machine small, but it is also highly feasible for small to medium-sized projects. Most importantly, you can create as many crafts as you want. There is no limit to the possibilities. There is something for everyone, be it custom cards, iron-on designs, or stickers. So, let's start with this machine and see what it entails!

What Can Cricut Joy Xtra Do?

This is an amazing tool for cutting, writing, drawing, and foiling to make popular projects like stickers, custom cards, T-shirts, decals, and more. It is compatible with over 50+ materials, including paper, vinyl, iron-on, and cardstock. One useful plus point for using this machine is that it can sync with your home inkjet printer as well. You can also print and cut designs. With its fine-point blade, it can create intricate designs with almost perfection and precision. In addition, it can write, draw, and foil too.

This tool is also compatible with varying material sizes, like US letter and A4 free. To use the machine, you have to use the Design Space app, which can be connected to it via Bluetooth. You can upload and cut your own designs or choose from the Design Space library.

What Are the Main Features of Cricut Joy Xtra?

The most important aspect of using this machine is that it is beginner-friendly. With the help of the Design Space software, even someone new to Cricut machines can easily create amazing DIY projects. One does not need to be a pro to use this machine.

The app comes with around 3,000 pre-installed “**Make It Now**” projects. These are in-built projects that are complementary to the software. You will have to connect the machine to your device to use them. First, you need to connect your machine and choose a project. Next, you have to click on “**Make It**,” and you are good to go. These projects are suitable for various materials and for every skill level, be it a beginner or professional crafter. With the Design Space app and its library of hundreds of fonts, images, and lines, customization isn’t a problem for any art and craft person.

How to Setup Cricut Joy Xtra?

The first step is to download the free Design Space app on your laptop, desktop, tablet, or mobile device. If you don’t already have one, create your Cricut ID.

1. If you already have one, log into your account, select **Machine Setup**, and tap on your machine model from the list to begin the setup process.
2. When prompted, connect your device and machine via Bluetooth. The name of the machine can be found on the bottom of your machine.

Your machine will then begin updating before you can use the [Cricut Joy Xtra](#). Ensure that you have at least 30 cm of space behind your machine, as your designs will roll through the back and might get damaged if hindered. So, have an ideal space of at least 30 cm in front and behind the machine.

In the included welcome pack, you will get some practice materials. To use them, follow the steps on your device to carry out your test cut and insert the vinyl into the machine under the two white tabs. Once setup and activation are done, you can perform the on-screen steps to begin cutting. Once the cut is complete, an unload button will appear on your Design Space screen. Tap this button, and the smart vinyl will unload from the machine.

It can also be used to draw and foil. Simply insert the pen or swap over the blade when prompted to do so in the app. It can cut materials up to 21.6 cm wide and 1.2 m long. When using smart materials, the print and cut function can also be used to create stickers for notebooks, jars, tumblers, and more.

Summing Up

With all these major features, crafting is much easier with the [Cricut Joy Xtra](#). It is a perfect tool for beginners who want to venture into DIY projects for mugs, shirts, cards, stickers, etc. It is perfect for every space with cutting compatibility of over 50 different materials, compact design, and lightweight. We hope that reading this blog will help readers to make informed decisions on their buying journey. Enjoy extra with Cricut!
