

# How to Set Up Cricut Explore 3: A Comprehensive Tutorial

Cricut Explore 3 is an amazing machine that you can use to create multiple DIY projects. This is the latest machine, which has all the new features that will enhance your crafting experience. So, if you have been using Cricut and want to update to a new machine or you want to purchase your first cutting machine, this will be a great choice.

You need to know [how to set up Cricut Explore 3](#) if you want to use the machine. I am going to guide you through the process to learn how to do that. I have been using this machine since it was launched, and I would like to ask you to follow the blog to learn how to set it up. You can use several devices to set up the machine, but I will write about a Windows computer here.

## How to Prepare Cricut Explore 3 for Setup?

When you want to learn [how to set up Cricut Explore 3](#), you should first unbox your machine and then start preparing the machine to set it up. When you open the machine, you get a few tools with the machine. However, those tools are not enough to work on any project. You will need to buy some other tools in order to work on the machine.

When you open the machine, you will find these items inside.

- Crafting machine
- Premium fine-point blade
- Safety document
- Quick start guide
- USB cable
- Power adapter
- Test cut materials
- Bonus materials

Once you have checked the materials, you have to do the following things to prepare your machine and then finish the setup.

1. To start with the setup, you should place the machine in a safe place.
2. Then, use the power adapter you got in the box and connect it to your machine and the wall socket.
3. Next, press the **power** button on the machine, and then it is prepared for the setup.
4. Now, you have to go to your browser and visit **[cricut.com/setup](https://cricut.com/setup)**.
5. After that, download the Design Space software on your computer.
6. Following this, you need to open the app and log in or sign up with your account.

7. Once you finish the setup, you can proceed with your first cut.

## How to Download Cricut Design Space on Your Computer?

In order to learn [how to set up Cricut Explore 3](#), you need to download the Design Space app on your computer. After downloading the app, you will need to log in using a Cricut ID, and if you have never made any user ID, you must create one to begin with your machine. Read the steps in the section below:

1. Start by opening the internet browser on your computer and then visit [cricut.com/setup](https://cricut.com/setup).
2. Then, click the checkbox to agree to Cricut's Terms of Use and Policy. After that, click on **Download**.

1. Next, go to the Downloads folder and open it. You will find the file over there. Click on it twice.
2. Now, a new window opens on your computer screen. It asks you whether you trust the app on your computer or not. You have to select the trust option.
3. After that, you can see that the app has started installing.

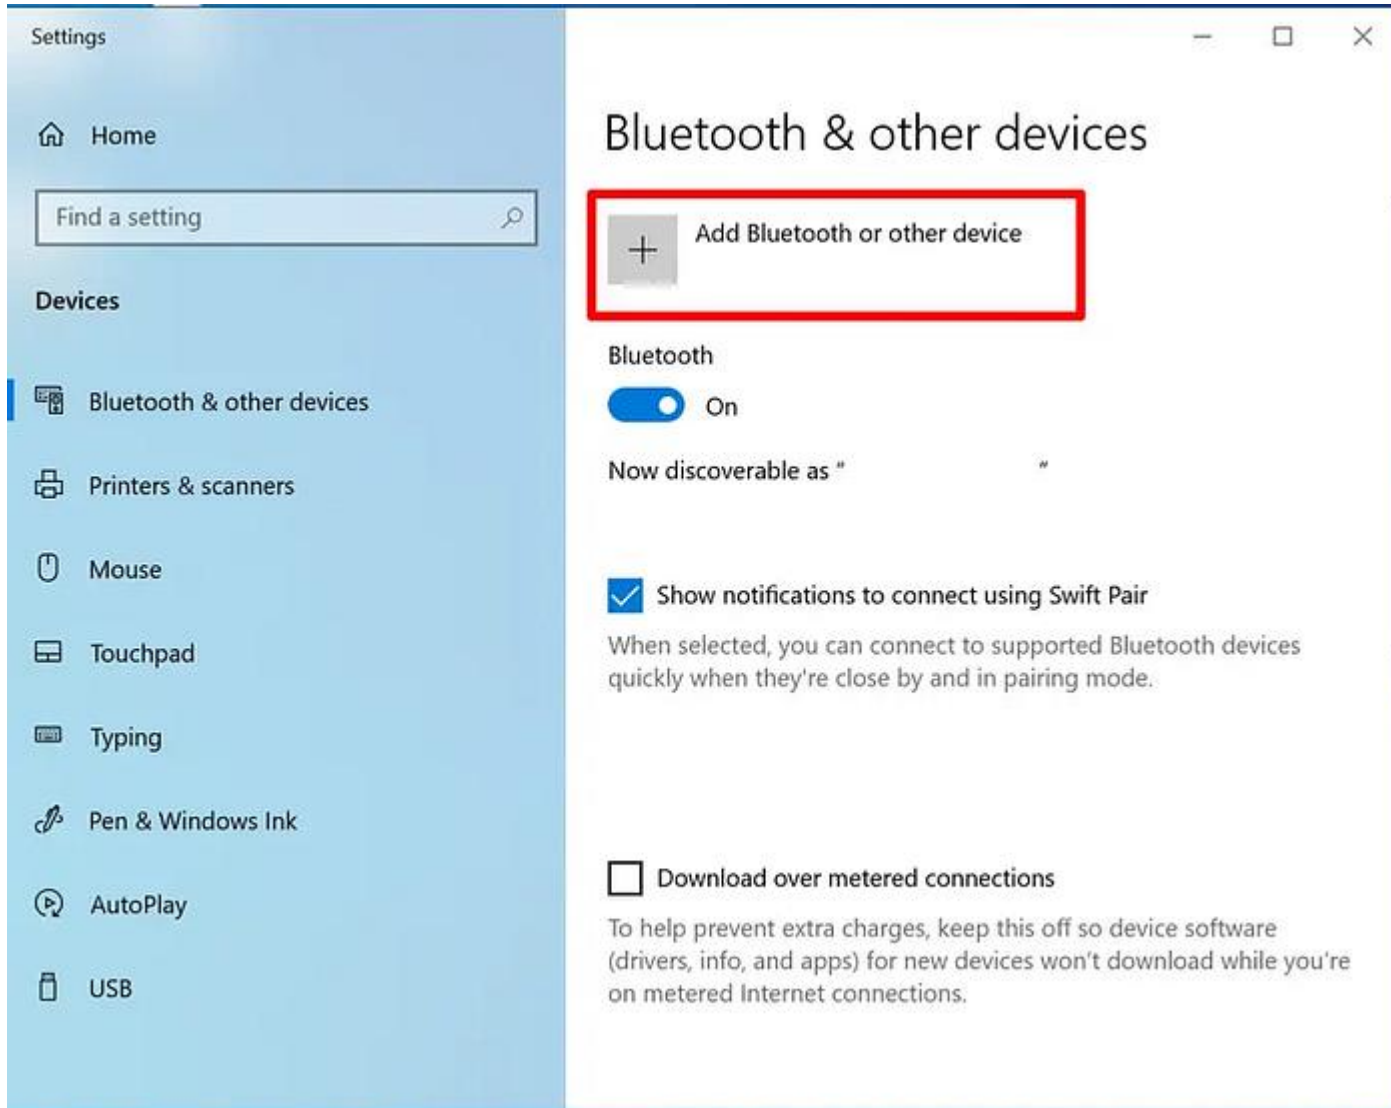

1. In the last step, you can log in with your email ID and password.

## How to Connect Cricut Explore 3 to Your Computer?

In the process of learning **how to set up Cricut Explore 3**, the final part you have to do is connect your machine to your computer. To connect your machine to your device, you can go for either Bluetooth or USB. Here, we will look at the Bluetooth connection. Check the steps below:

1. Make sure that you have turned on the Explore machine and keep it within 10–15 feet of your computer.
2. Now, find the **Start menu** at the bottom left side of your computer and go to **Settings**.

3. After that, open the **Devices** option on the computer and turn on Bluetooth.
4. Next, click on **Add Bluetooth or other device** and select Bluetooth later.

1. Also, you will have to select the machine from the list of devices available to connect.
2. The cutting machine will be connected to your computer very soon.

Your machine setup on your computer is complete. To make any project or cut any design, you can create or pick a design on the Design Space app and then cut it on your machine.

## **Conclusion**

To sum up, you read about [how to set up Cricut Explore 3](#), and I am sure after reading the blog, you will learn how to do it. To set up your cutting machine, you need to remove the packaging and the items from the machine. Then, you should prepare to set up the machine. Once you are ready, you will have to download the Design Space app and connect your machine to it. After downloading the app and logging into it, your setup will be complete. Now, you can start working on your projects.
